## AGENDA ITEM

## 1. Softball Bat Testing

 (NCSBCA)
## RECOMMENDATION $\quad$ SUPPORTING INFORMATION

To approve mandatory Bat Testing to the NCHSAA rules for post season play:

## Procedure:

--The NCHSAA will require all counties to have at least one bat-testing machine and at least one certified machine tester. The tester cannot be a coach--must be a neutral tester, i.e. County or School Athletic Director --Bats must be tested at a designated site prior to post-season play --Bat testers must use the USA Softball Bat List for specific bat pressures
Note: some bats, i.e. Easton Ghost will fall in the illegal range; however, these bats can be legal based on different pressure allowances --Bats must pass 2 out of 3 test attempts to be legal
--Once tested, an approved bat will receive a sticker applied by the bat tester --Any bat being used at the State Championship game that does not have a sticker of testing approval will need to be tested on site and may run the risk of being "thrown out" if it fails

Rationale: Bat testing was an issue last season during the state championship game where bats that failed were not allowed to be used, new bats purchased, and comfort levels of the athletes were depleted. Bats were thrown out last year just because they were "in the red" and were not checked per the USA Softball Bat List, this needs to be something that is changed so that appropriate pressures are administered during each test.

The North Carolina Softball Coaches Association would like to help to make a change so that moving forward this will not happen again.
Budget Impact: If the NCHSAA is unable to fund then the most feasible way for funding would be for each school in the county to split the cost. Example; if Alamance county did this the cost would be roughly $\$ 125$ per school for one machine.
Equity Impact: Baseball uses a PSI, so testing unnecessary
Effective Date: 2024 Softball Season

## AGENDA ITEM

2. Softball Game Ending Procedure
(NCSBCA)

| RECOMMENDATION | SUPPORTING INFORMATION |
| :--- | ---: |

## AGENDA ITEM

3. 7-Innings Rule in Softball
(NCSBCA)

## RECOMMENDATION <br> A. To allow JV Softball rostered players to

 participate in 7 additional innings at the Varsity level in a week.B. To allow JV pitchers six (6) extra innings of pitching OR the 7 innings of play at a different position or as a DP.

Procedure:
--Coaches and Athletic Directors must fill out a form for the week (very much like that of Basketball and Football has to do) --JV players who dress for the game will NOT be considered as "Played in the Game" UNLESS they actually enter the game.

## SUPPORTING INFORMATION

## Rationale:

There is a shortage of JV teams in the state. JV teams now are playing teams 3, 4 , and 5 times in a season just to get an adequate amount of games into their schedule. Basketball and Football both have rules in place that allow for players to participate on both JV and Varsity in the same week and we feel that having something in place for Softball will help the sport to grow again and allow these student athletes to participate in a full season schedule like the other sports are able to do.
7 innings was brought up as rationale to give no more innings in a week than would be IF there was a $4^{\text {th }}$ game on a Saturday.

## Educational None

Impact:
Equity Impact: Across other sports with JV and Varsity there have been changes made for athletes to fluctuate; Basketball, Football mainly. Baseball has a pitch count that helps with moving up and down but is also a sport that has very high numbers for participation. Softball with the numbers the way they are and a 9 Inning rule in place will again hopefully help to grow the sport to the levels of participation of Basketball, Football, and others.
Effective Date: 2024 Softball Season

# NORTH CAROLINA HIGH SCHOOL ATHLETIC ASSOCIATION Meeting of the Board of Directors - Agenda Item Submission 

Name(s): Rodney King, Executive Director

School/LEA/Conference/Group: North Carolina Track \& Cross Country Coaches Association Board of Directors

We request that the following item be placed on the agenda for the next meeting of the NCHSAA Board of Directors:

## Recommendation/Proposal:

In order to make qualifying for the NCHSAA Indoor Track State Championships more equitable for athletes who attempt qualification on a 200 meter flat track rather than at a polar bear meet (outdoor track), or on a banked track, the following times would be deducted (subtracted) for JDL Fast Track marks to determine if an athlete meets current qualification standards.

|  | Boys |  | Girls |  |
| :--- | :--- | :--- | :--- | :---: |
| Event | Conversion | Event | Conversion |  |
| 300 m | -0.62 | 300 m | -0.62 |  |
| 500 m | -1.06 | 500 m | -1.05 |  |
| 1000 m | -2.20 | 1000 m | -2.15 |  |
| 1600 m | -3.50 | 1600 m | -3.25 |  |
| 3200 m | -6.80 | 3200 m | -6.10 |  |
| $4 \times 200 \mathrm{~m}$ | -1.70 | $4 \times 200$ | -1.75 |  |
| $4 \times 400 \mathrm{~m}$ | -3.50 | $4 \times 400$ | -3.50 |  |
| $4 \times 800 \mathrm{~m}$ | -7.50 | $4 \times 800$ | -7.50 |  |

## Rationale:

Athletes have an inherent advantage running a polar bear meet on an outdoor track with fewer laps and wider turns versus the 200m flat track at JDL Fast Track, which hosts the NCHSAA Indoor Track State Championship. Additionally, there are 200m banked tracks in neighboring states that often host invitationals where athletes may qualify for the NCHSAA Indoor State meet.

Until 2012, the NCAA also dealt with some of the inequalities of various track sizes and configurations. Flat tracks measuring 200 m are the most common indoor track size due to facility constraints and cost, but the NCAA also deals with 200 m banked tracks, oversized tracks, and undersized flat tracks. To combat this, the NCAA introduced revised track size conversions in August of 2012. They reviewed five years' worth of data and developed a formula whereby a new conversion was developed for each race. They noted in their document that "a definite linear relationship between facility types does exist." Their dataset produced a different conversion index for each event and also separated it out by gender.

At the NCHSAA level, a similar conversion needs to be implemented to address the inequalities that exist for athletes who compete at polar bear meets versus banked tracks versus flat tracks. Currently, if a team wants to come to JDL Fast Track to qualify and gain experience on the state meet track, they are at a disadvantage to those schools who qualify at a polar bear or banked facility, such as Liberty University or Virginia Beach. We would not need conversions for field events or for the 55 M or 55 H , since they are not affected by the track type.

MileSplit is owned by FloSports and used for all North Carolina Indoor and Outdoor Track and Field results and Regional/State entries. They currently do not have the technology to add the requested conversion to results from the winter meets, Polar Bear and banked tracks. Craig Longhurst, JDL Fast Track manager and director, has indicated he may be able to have his intern do the negative conversions for meets run at his facility. The number of athletes requiring conversions would be significantly smaller using the JDL results rather than requiring someone else to do all conversions by hand and then input them into the database.

Mr. Longhurst took data from the 2023 NCHSAA Indoor Track and Field Championships. It included the total number of qualifiers in all applicable running events, boys and girls combined:

- $1 \mathrm{~A} / 2 \mathrm{~A}-225$ total qualifiers in these events; 90 from JDL and 135 from banked/polar
- 3A - 294 total qualifiers in these events; 84 from JDL and 210 from banked/polar
- $4 \mathrm{~A}-308$ total qualifiers in these events; 98 from JDL and 210 from banked/polar From the data shown above, it would be simpler and less time consuming to deduct times run at JDL from 272 entries rather than adding the conversion to 555 entries.

Conversions were made based on the current qualifying standard, applied the recommended conversion, and then took the variance between the current standard and the converted standard. The conversion would be applied to each classification to normalize them and reduce confusion among coaches.

## Budget Impact:

Zero financial impact on any individual school/LEA

## Educational Impact:

Zero educational impact on any individual school/LEA

## Gender Impact:

Zero gender impact on any student

## Effective Date:

Beginning of NCHSAA Indoor Track and Field competition, November 2023
